

Technical Requirements Notice to PGA ACE users who anticipate using the ACE Portal to access the M-1 functions

We have been informed that the portal applications for the ACE M-1 user interface have been built using JAVA 1.6. We understand from conversations with several PGAs that there may have been differences in JAVA versions between CBP and other PGAs. Please ensure that the computers you intend to use to access ACE for M-1 support JAVA 1.6. It is likely that if your computer has a different version of JAVA enabled, the ACE Portal applications for M-1 will not work correctly. If you have any questions on this notice, please feel free to contact Susan Dyszel (202-863-6211 or Susan.Dyszel@dhs.gov)
