

ACE Drop A1: Master Data and Enhanced Accounts *Summary*

What's in A1?

Trade account types will be added (e.g. FTZ operators and sureties)

The following master data will be incorporated into ACE:

- Organizational Data (i.e. port codes, FIRMS codes, etc.)
- Reference Data to support ESAR transactions (i.e. country codes)
- Tariff file data
- Currency file data

New Functionality for PGAs

Census HTS Administrator - The U.S. Census Bureau will set edit parameters in the Harmonized Tariff Schedule through ACE. Census will also be able to create customized reports essential to its statistical mission

ITC HTS Administrator - The International Trade Commission will be able to view and validate CBP updates to the Harmonized Tariff Schedule

FTZ Board Administrator - The U.S. Foreign Trade Zones Board will use the ACE Portal to create and maintain foreign trade zone accounts

PGA LPC Administrator - PGAs will be able to attach and update LPCs to various accounts in ACE

PGA Role Administrator - PGAs will be able to designate individuals to manage user access to ACE within their agency

PGA Commodity Analyst – PGAs will be able to review trade account information, as well as view, query, and customize reports
